

XRD 0822 AO, AP

Industrial Flat Panel Detector

Superior Image Quality High Dynamic Range

XRD 0822 is part of the Varex Imaging's family of 8-inch (20 cm) amorphous silicon Flat Panel Detectors.

OVERVIEW

Varex Imaging XRD 0822 digital Flat Panel X-ray Detector (FPD) is available in two configurations - AO and AP.

XRD 0822 AO provides over 78 dB of dynamic range and frame rates up to 30 frames per second (fps). The enhanced performance XRD 0822 AP offers over 88 dB of dynamic range and frame rates up to 100 fps via several read-out modes. Both detectors support a broad range of energy levels from 20 kV-15 MV and are available with several shielding and scintillator options.

Rapid system integration is accomplished via Gigabit Ethernet data communication, integrated trigger and X-ray synchronization circuitry, and a comprehensive software library for image acquisition and processing.

Wide energy range, variable frame rates and multiple shielding options allow the XRD 0822 to meet demanding component requirements in various applications¹ such as industrial non destructive testing, radiation therapy for cancer treatment, as well as veterinary and life and physical science.
